Nature Recovery Plan

JUMPERS RECREATION GROUND

Thanks to funding from the **Green Recovery Challenge Fund**, during 2022 we'll be making some changes to Jumpers Recreation Ground and we'd love to hear your thoughts.

Find out how to get involved and provide feedback on these ideas at:

www.parksfoundation.org.uk/nature-recovery

1 Grassy meadow

Great for bees, bugs and butterflies! This meadow will provide a home for our pollinators to feed and shelter in.

2 Park benches

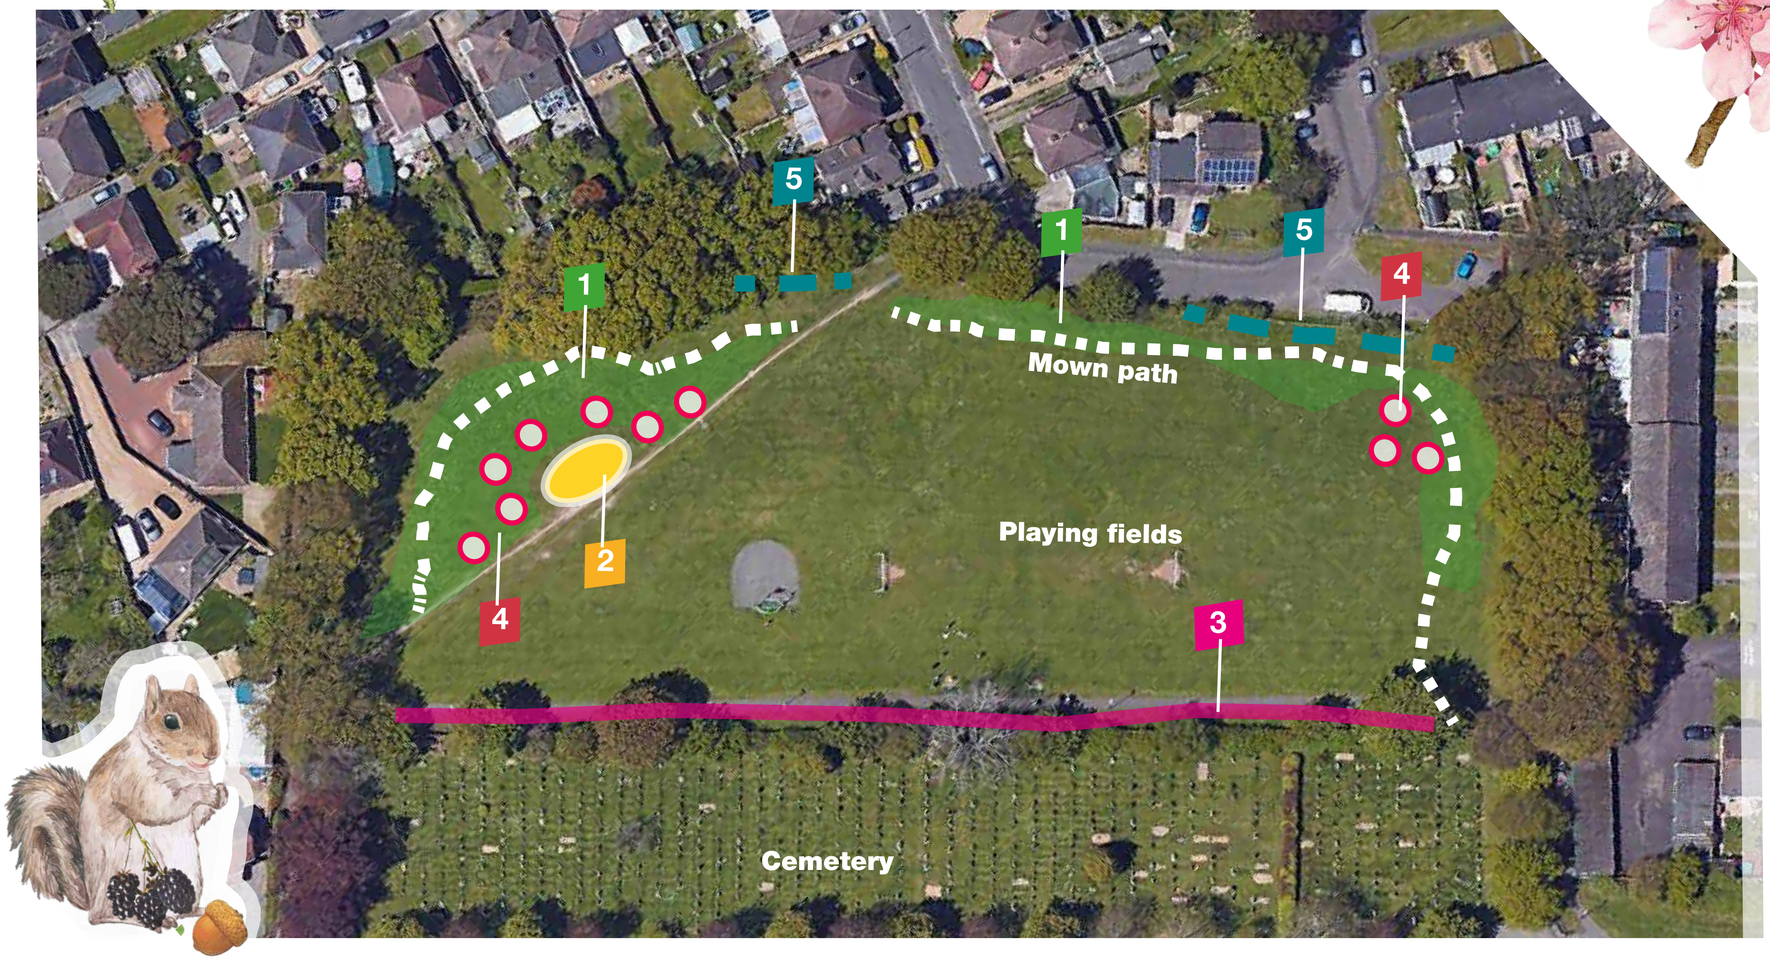
Take a seat and have a rest. Close your eyes, listen to the sounds of nature or bring some bird seed and makes friends with the local robins.

3 A carpet of spring flowers

Bluebells, anemones, primroses, crocus and daffodils provide an important source of nectar for insects early in the year - and a beautiful splash of colour for us to enjoy.

4 Blossom trees

A small group of blossom trees, such as wild cherry and crab apple, will make a lovely memorable place for people to meet and enjoy. Birds will feast on the berries in the autum.



5 Native shrubs

Planting of native shrubs within the gaps along the boundary will provide refuge and nesting sites for songbirds and small mammals. The berries of hawthorn and blackthorn, and the nuts of hazel are a great source of food for them too.
