

# GREEN HEART PARK

## SHERBORN CRESCENT

### 1 Native shrubs and hedges

Planting of native shrubs will provide refuge and nesting sites for songbirds and small mammals. The berries of hawthorn and blackthorn, and the nuts of hazel are a great source of food for them too.

### 2 A carpet of spring flowers

Here we will clear the non-native shrubs and plant spring flowering bulbs. Bluebells, anemones, cowslip and daffodils will provide an important source of nectar for insects early in the year.

### 3 Mini-wetland

By creating a shallow depression we create a place to feed for birds which find lots of beetles and bugs in the wet muddy ground. Keep your eyes peeled for dragonflies and damselflies!

### 4 Grassy meadow

Great for bees, beetles and butterflies! This meadow will provide a home for our pollinators to feed and shelter in.

During 2023-24 The Parks Foundation in partnership with BCP Council will be making changes to Sherborn Park.

These enhancements will bring people closer to nature and help wildlife thrive.

We would love to have your thoughts on these enhancements and encourage you to give feedback. You can either visit [www.parksfoundation.org.uk/green-heart-parks/](http://www.parksfoundation.org.uk/green-heart-parks/) or scan the QR code.

Helping nature thrive in our parks

### 7 Woodland trees

Trees planted in grassy meadows with bulb planting below. Their tree canopy will eventually link to the surrounding trees encouraging wildlife into our park.

### 6 Step into Nature

Follow a trail of logs and rocks leading you through the meadow. Hop, jump and discover the marvellous creatures that live in the long grass!

### 5 Bird & bat boxes

### 5 House martin tower
